PROFILE

Software engineer with production experience in React/TypeScript and full-stack development, alongside three years of enterprise IT support. Passionate about building tools that make complex information accessible to diverse users while addressing real-world challenges. Currently working in an MSP environment as an IT Systems Engineer, managing and troubleshooting multi-tenant Microsoft 365, backup, and network infrastructure for multiple businesses simultaneously.

EXPERIENCE

IT Systems Engineer

Mar 2026 - Present

Technicalities, Heatherton

Managed service provider delivering IT, cloud and infrastructure support to multiple business clients.

- Resolve Leading delivery of a client's Flutter app rebuild, building new features in Flutter/Dart against a Firebase backend and owning testing and release
- Managing the iOS build and release process, covering signing, provisioning profiles, and App Store Connect submission
- Built and maintain PowerShell automation for mailbox provisioning, licence management, policy enforcement and user administration across enterprise tenants, replacing repetitive manual work.
- Investigate and resolve escalated production issues across client endpoints and network infrastructure using N-able N-central and TakeControl remote tooling.
- Translate technical findings into clear, actionable guidance for non-technical decision-makers across several client businesses, switching context rapidly between environments.

Full-Stack Developer Intern

Feb 2025 - Jul 2025

DineSeal (Vision Verse Interactive Pty Ltd), Remote

Small product team building a gamified customer loyalty platform for hospitality venues.

- Delivered production full-stack features in TypeScript, React and Next.js, including a Craft.js drag-and-drop page builder used to compose customer-facing loyalty pages.
- Built a reusable component system with block-level editing, duplication, reordering and nested groups, serialising editor state to compressed JSON and persisting it through Next.js API routes and GraphQL.
- Debugged live issues spanning component lifecycle, state management and API integration, improving the stability of the editor in production.
- Delivered responsive interfaces across mobile and desktop viewports, with design QA carried out against Figma specifications.
- Worked in an agile Kanban workflow with biweekly standups and peer code review on GitHub, maintaining documentation that shortened onboarding for new team members.
- Maintained technical documentation that accelerated team onboarding, and collaborated in an agile Kanban workflow with standups and peer code review on GitHub

Web Developer Intern

Mar 2023 - Nov 2023

Mobile Learning Unit, University of Melbourne

In-house team maintaining the React learning management system used by the medical faculty.

- Maintained Contributed frontend features to a React learning management system serving more than 40,000 medical students, supporting platform reliability at scale.
- Developed a revamped media carousel deployed across the entire university learning platform, improving how students and staff identify and access learning modules.
- Led a website domain migration with zero downtime, managing DNS configuration and coordination with hosting providers.
- Customised and tested Salesforce Apex modules, improving workflows for course administrators.

Student IT Consultant

Jun 2022 - Feb 2026

University of Melbourne, Parkville

- Diagnosed and resolved enterprise connectivity and authentication issues, including 802.1x Wi-Fi, VPN, certificate management, TCP/IP, DNS and DHCP, across Windows and macOS.
- Managed incident tracking in ServiceNow and contributed knowledge base articles used by the wider support team.
- Explained complex technical issues clearly to users from a wide range of technical backgrounds.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, Dart, PowerShell, HTML5, CSS3
- **Frontend:** React, Next.js, React Leaflet, Craft.js, Tailwind CSS, React Context API
- **Backend and APIs:** Node.js, Next.js API routes, GraphQL (Hasura), REST APIs
- **Databases:** MongoDB, PostgreSQL, Supabase
- **Mobile:** Flutter, Firebase, Xcode and CocoaPods build tooling
- **AI-assisted development:** Claude Code, Cursor, implementation and code review workflows
- **Testing and quality:** Jest, React Testing Library, unit testing, design QA against Figma specifications
- **Cloud and DevOps:** Docker, Kubernetes, AWS and Azure fundamentals, Git and GitHub
- **Ways of working:** Agile, Scrum, Kanban, Jira, peer code review, stakeholder UAT

EDUCATION

Master of Software Engineering

Feb 2024 - Dec 2025

The University of Melbourne

Computing and Information Systems Discipline Award Winner

- Relevant subjects: Cluster & Cloud Computing (AWS/Azure/Docker/Kubernetes), Distributed Systems, Web Security, Security & Software Testing, High Integrity Systems Engineering

Bachelor of Science

Mar 2021 - Dec 2023

The University of Melbourne

Major in Computing and Software Systems

- Relevant subjects: Computer Systems (TCP/IP, networking), Information Security & Privacy, Algorithms & Data Structures, Database Systems
